PROFESSIONAL SUMMARY

Full-Stack Web Developer and AI Engineer with close to 2 years of experience shipping production-ready web applications from client discovery through deployment. Skilled in React, Next.js, Node.js, and TypeScript, with hands-on use of AI-assisted workflows (OpenAI API, GitHub Copilot, ChatGPT, Claude) to build fast without compromising quality. Founder of AlphaGeeks, leading technical delivery on AgencyOS (AI-powered CRM) and MediPOS (pharmacy POS), with client projects consistently scoring 90+ on Google PageSpeed for Performance, Accessibility, and SEO.

Highlights: Founder of AlphaGeeks | 5 production web apps shipped | 90+ Google PageSpeed scores | AI-assisted development

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL

Frontend: React.js, Next.js, Server-Side Rendering (SSR), Tailwind CSS, HTML5, CSS3, Responsive Web Design, UI/UX Design, shadcn/ui, Framer Motion, GSAP, Anime.js, Three.js

Backend: Node.js, Express.js, Prisma ORM, RESTful API Design, API Integration

Databases: PostgreSQL, MongoDB, SQLite, better-sqlite3, Supabase, Firebase, Firestore

Testing: Jest, Unit Testing, Test-Driven Development (TDD), Integration Testing, Debugging, Code Review

Desktop: Electron, Vite, Cross-Platform Desktop Applications, Offline-First / Local-First Architecture

CMS: WordPress

Tools & Platforms: Git, GitHub, Vercel, Netlify, CI/CD, npm

AI & Automation: OpenAI API Integration, Large Language Model (LLM) Integration, ChatGPT, Claude, GitHub Copilot, Cursor, n8n Workflow Automation, Business Process Automation, AI-Assisted Development, Prompt Engineering

Practices: Agile Development, SDLC, SEO, Performance Optimization, Web Accessibility (WCAG), Cross-Browser Compatibility, Scalable Web Applications, Role-Based Access Control (RBAC), Data Integrity, Transaction Safety, Version Control, Web Security, Technical Documentation

Professional: Client Communication, Client Relationship Management, Requirements Gathering, Problem-Solving, Adaptability, End-to-End Project Ownership

Spoken Languages: English, Urdu, Punjabi

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer & Founder, AlphaGeeks

Jan 2025 - Present

Lahore, Pakistan (Hybrid/Remote)

- Build and launch production websites and full-stack web applications using Next.js, React, Tailwind CSS, and Node.js, shipping five production apps to date as founder of AlphaGeeks.
- Delivered three production-ready client projects to date, owning technical delivery, quality assurance, and client relationships from discovery through launch.
- Drove a 23% increase in client inquiry volume through rebuilt web presences and conversion-focused quote-request flows for agency clients.
- Modernized a freight/logistics client's online presence using Tailwind CSS, JavaScript, and Three.js, designing a dispatch-team-specific quote-request workflow to streamline service inquiries.
- Led client engagements from discovery call through launch using an Agile, sprint-based workflow: gathered requirements directly from stakeholders, mapped site information architecture, and delivered handoff documentation to keep builds on schedule and maintainable after handover.
- Maintained a consistent ~24-hour client response time as a standing service commitment, supporting client trust and repeat engagement.
- Use AI tools (OpenAI API, GitHub Copilot, ChatGPT, Claude) daily to accelerate coding, debugging, and documentation, cutting development time on client and internal projects.
- Designing and developing AgencyOS, an internal CRM and workflow-automation platform, using Next.js, Prisma ORM, Supabase, and the OpenAI API to consolidate the agency's operations onto one system.

PROJECTS

AgencyOS: AI-Powered Agency Operating System

Active Development

Next.js, React, Prisma ORM, PostgreSQL, Supabase, OpenAI API, n8n, Jest

- Designing and developing an AI-powered operating system that centralizes CRM, project management, finance, documents, and client communication into a single platform for digital agencies.
- Building a unified architecture using Prisma ORM and PostgreSQL via Supabase with a scalable, modular codebase.
- Integrating OpenAI APIs to automate proposal generation, email drafting, workflow summaries, and business operations.
- Developing self-hosted automation pipelines with n8n to reduce repetitive administrative work.
- Writing unit tests with Jest to validate core business logic and improve code quality and maintainability.
- Core CRM, authentication, project management, AI modules, and workflow automation are in active development ahead of production release.

MediPOS: Pharmacy POS & Inventory Management System

Electron, React, JavaScript, SQLite, better-sqlite3, Vite

- Built a local-first desktop pharmacy POS with Electron, React, and SQLite, supporting offline operations, medicine CRUD, POS billing, invoice management, and printer-ready receipts.
- Implemented FEFO inventory management, batch/expiry tracking, tablet-level pricing, discounts, cash/credit payments, customer phone search, and role-based Admin/User access.
- Designed transaction-safe financial logic using integer paisa, automatic backups, and an architecture prepared for future cloud synchronization.

American ASK4 Logistics: Company Website

Tailwind CSS, JavaScript, Three.js

- Designed and developed a high-performance logistics website, modernizing the company's online presence with a mobile-first, responsive build.
- Designed a quote-request flow tailored to dispatch teams, plus clear service breakdowns, with a focus on speed, SEO, and scalability.
- Scored 90+ across Performance, Accessibility, SEO, and Best Practices on Google PageSpeed Insights (Mobile and Desktop). Live in production.

Personal Portfolio Website (Creative Graphic Designer)

Next.js, Tailwind CSS, Framer Motion

- Designed and developed a personal portfolio for a client, using a clean case-study layout so the client's own work stays the visual focus rather than the template.
- Scored 90+ across Performance, Accessibility, and Best Practices on Google PageSpeed Insights (Mobile).

AlphaGeeks Website

Next.js 15, Tailwind CSS, Framer Motion, GSAP, Anime.js

- Designed, developed, and deployed the agency's own site to win client trust rather than just attention: a scroll-driven brand story, services grid, and conversion-focused contact flow.
- Scored 90+ across Performance, Accessibility, Best Practices, and SEO on Google PageSpeed Insights (Mobile and Desktop).

TahaBuilds Portfolio

Next.js, Framer Motion, Anime.js

- Personal portfolio showcasing selected projects, technical case studies, and development expertise; optimized for SEO and Core Web Vitals, deployed and maintained on Vercel.

EDUCATION

Associate Degree Program (ADP) in Computer Science

Oct 2023 - Aug 2025

University of Central Punjab (UCP), Lahore, Pakistan | CGPA: 3.52 / 4.00

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Programming, Web Application Development, Operating Systems, Mobile Application Development

BS Information Technology (BSIT), In Progress

University of Education (UE), Division of Science and Technology

ICS, Computer Science

Oct 2021 - May 2022

Punjab Group of Colleges | Grade: A

CERTIFICATIONS

- Foundations of Cybersecurity, Google | Issued Aug 2025 | Credential ID: 3ANF4NMHGH
