~4 Years Experience • Founder, AlphaGeeks • 5 Production Web Apps Shipped • 90+ Google PageSpeed Scores • AI-Assisted Development

PROFESSIONAL SUMMARY

Full-Stack Web Developer and AI Engineer with close to 4 years of experience shipping production-ready web applications from client discovery through deployment. Skilled in React, Next.js, Node.js, and TypeScript, with hands-on use of AI-assisted workflows (OpenAI API, GitHub Copilot, ChatGPT, Claude) to build fast without compromising quality. Founder of AlphaGeeks, leading technical delivery on AgencyOS (AI-powered CRM) and MediPOS (pharmacy POS), with client projects consistently scoring 90+ on Google PageSpeed for Performance, Accessibility, and SEO.

Tech Stack: React · Next.js · Node.js · TypeScript · JavaScript · PostgreSQL · MongoDB · SQLite · REST APIs · OpenAI API

Also searchable as: Full Stack Developer · Web Developer · Front-End Developer · Back-End Developer · JavaScript Developer · TypeScript Developer · AI-Integrated Software Engineer

CORE SKILLS

Languages: JavaScript, TypeScript, PHP, SQL

Frontend Development: React.js, Next.js, Server-Side Rendering (SSR), Tailwind CSS, HTML5, CSS3, Responsive Web Design, UI/UX Design, shadcn/ui, Framer Motion, GSAP, Anime.js, Three.js

Backend Development: Node.js, Express.js, Prisma ORM, RESTful API Design, API Integration, Server-Side Development

Databases: PostgreSQL, MongoDB, SQLite, better-sqlite3, Supabase, Firebase, Firestore

Testing & Quality Assurance: Jest, Unit Testing, Test-Driven Development (TDD), Integration Testing, Debugging, Code Review

Desktop Development: Electron, Vite, Cross-Platform Desktop Applications, Offline-First / Local-First Architecture

CMS: WordPress

Tools & Platforms: Git, GitHub, Vercel, Netlify, CI/CD, npm

Practices: Agile Development, Software Development Life Cycle (SDLC), SEO, Performance Optimization, Web Accessibility (WCAG), Cross-Browser Compatibility, Scalable Web Applications, Role-Based Access Control (RBAC), Data Integrity, Transaction Safety, Version Control, Web Security, Client Relationship Management, Technical Documentation

AI & Automation: Expert in using AI for fast, high-quality development — comfortable working daily with OpenAI API Integration, Large Language Model (LLM) Integration, ChatGPT, Claude, GitHub Copilot, and Cursor for rapid prototyping, code generation, debugging, and workflow automation; n8n Workflow Automation, Business Process Automation, AI-Assisted Development, Prompt Engineering

Professional Skills: Client Communication, Requirements Gathering, Problem-Solving, Adaptability, Technical Documentation, End-to-End Project Ownership

Languages Spoken: English, Urdu, Punjabi

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer & Founder — AlphaGeeks

Jan 2025 – Present

Lahore, Pakistan (Hybrid/Remote)

- Build and launch production websites and full-stack web applications using Next.js, React, Tailwind CSS, and Node.js, shipping five production apps to date as founder of AlphaGeeks.
- Delivered three production-ready client projects to date, owning technical delivery, quality assurance, and client relationships from discovery through launch.
- Drove a 23% increase in client inquiry volume through rebuilt web presences and conversion-focused quote-request flows for agency clients.
- Modernized a freight/logistics client's online presence using Tailwind CSS, JavaScript, and Three.js, designing a dispatch-team-specific quote-request workflow to streamline service inquiries.

- Led client engagements from discovery call through launch using an Agile, sprint-based workflow — gathering requirements directly from stakeholders, mapping site information architecture, and delivering handoff documentation — keeping builds on schedule and maintainable after handover.
- Maintained a consistent ~24-hour client response time as a standing service commitment, supporting client trust and repeat engagement.
- Use AI tools (OpenAI API, GitHub Copilot, ChatGPT, Claude) daily to accelerate coding, debugging, and documentation, cutting development time on client and internal projects.
- Designing and developing AgencyOS, an internal CRM and workflow-automation platform, using Next.js, Prisma ORM, Supabase, and the OpenAI API to consolidate the agency's own operations onto one system.

PROJECTS

AgencyOS — AI-Powered Agency Operating System

Active Development

Next.js, React, Prisma ORM, PostgreSQL, Supabase, OpenAI API, n8n, Jest

- Designing and developing an AI-powered operating system that centralizes CRM, project management, finance, documents, and client communication into a single platform for digital agencies.
- Building a unified architecture using Prisma ORM and PostgreSQL via Supabase with a scalable, modular codebase.
- Integrating OpenAI APIs to automate proposal generation, email drafting, workflow summaries, and business operations.
- Developing self-hosted automation pipelines with n8n to reduce repetitive administrative work.
- Writing unit tests with Jest to validate core business logic and improve overall code quality and maintainability.
- Core CRM, authentication, project management, AI modules, and workflow automation are actively under development with continuous UI and feature improvements before production release.

MediPOS — Pharmacy POS & Inventory Management System

Electron, React, JavaScript, SQLite, better-sqlite3, Vite

- Built a local-first desktop pharmacy POS with Electron, React, and SQLite, supporting offline operations, medicine CRUD, POS billing, invoice management, and printer-ready receipts.
- Implemented FEFO inventory management, batch/expiry tracking, tablet-level pricing, discounts, cash/credit payments, customer phone search, and role-based Admin/User access.
- Designed transaction-safe financial logic using integer paisa, automatic backups, and an architecture prepared for future cloud synchronization.

[American ASK4 Logistics](#) — Company Website

Tailwind CSS, JavaScript, Three.js

- Designed and developed a high-performance logistics website, modernizing the company's online presence with a mobile-first, responsive build.
- Designed a quote-request flow tailored to dispatch teams, plus clear service breakdowns, with a focus on speed, SEO, and scalability.
- Scored 90+ across Performance, Accessibility, SEO, and Best Practices on Google PageSpeed Insights (Mobile & Desktop). Live in production.

[Personal Portfolio Website](#) — Creative Graphic Designer

Next.js, Tailwind CSS, Framer Motion

- Designed and developed a personal portfolio for a client, using a clean case-study layout so the client's own work stays the visual focus rather than the template.
- Scored 90+ across Performance, Accessibility, and Best Practices on Google PageSpeed Insights (Mobile).

[AlphaGeeks Website](#)

Next.js 15, Tailwind CSS, Framer Motion, GSAP, Anime.js

- Designed, developed, and deployed the agency's own site to win client trust rather than just attention — a scroll-driven brand story, services grid, and conversion-focused contact flow.
- Scored 90+ across Performance, Accessibility, Best Practices, and SEO on Google PageSpeed Insights (Mobile & Desktop).

[TahaBuilds Portfolio](#)

Next.js, Framer Motion, Anime.js

- Personal portfolio showcasing selected projects, technical case studies, and development expertise; optimized for SEO and Core Web Vitals, deployed and maintained on Vercel.

EDUCATION

Associate Degree Program (ADP) in Computer Science — University of Central Punjab (UCP), Lahore, Pakistan Oct 2023 – Aug 2025

- CGPA: 3.52 / 4.00
- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Programming, Web Application Development, Operating Systems, Mobile Application Development

BS Information Technology (BSIT) — In Progress — University of Education (UE), Division of Science and Technology

ICS, Computer Science — Punjab Group of Colleges

Oct 2021 – May 2022 | Grade: A

CERTIFICATIONS

- Foundations of Cybersecurity — Google | Issued Aug 2025 | Credential ID: 3ANF4NMHGH
