3+ Years Experience • Founder, AlphaGeeks • 5 Production Web Apps Shipped • 100/100 Google PageSpeed Scores

PROFESSIONAL SUMMARY

Full-Stack Developer and Founder of AlphaGeeks with 3+ years of experience designing, building, and shipping scalable web applications, desktop software, and AI-powered automation systems for startups and growing businesses. Proven track record delivering production-ready solutions end-to-end — from client discovery through deployment — using React, Next.js, Node.js, TypeScript, Electron, and modern backend and database technologies, backed by RESTful API design, database architecture, and unit testing with Jest. Multiple client projects have achieved perfect or near-perfect Google PageSpeed scores across Performance, Accessibility, and SEO. Currently designing and developing AgencyOS, an AI-powered CRM and automation platform, and MediPOS, a desktop-based pharmacy point-of-sale and inventory management system built with Electron, React, and SQLite.

CORE SKILLS

Languages: JavaScript, TypeScript, PHP, SQL

Frontend Development: React.js, Next.js, Server-Side Rendering (SSR), Tailwind CSS, HTML5, CSS3, Responsive Web Design, UI/UX Design, shadcn/ui, Framer Motion, GSAP, Anime.js, Three.js

Backend Development: Node.js, Express.js, Prisma ORM, RESTful API Design, API Integration, Server-Side Development

Databases: PostgreSQL, MongoDB, SQLite, better-sqlite3, Supabase, Firebase, Firestore

Testing & Quality Assurance: Jest, Unit Testing, Test-Driven Development (TDD), Integration Testing, Debugging, Code Review

Desktop Development: Electron, Vite, Cross-Platform Desktop Applications, Offline-First / Local-First Architecture

AI & Automation: OpenAI API Integration, Large Language Model (LLM) Integration, n8n Workflow Automation, Business Process Automation

CMS: WordPress

Tools & Platforms: Git, GitHub, Vercel, Netlify, CI/CD, npm

Practices: Agile Development, Software Development Life Cycle (SDLC), SEO, Performance Optimization, Web Accessibility (WCAG), Cross-Browser Compatibility, Scalable Web Applications, Role-Based Access Control (RBAC), Data Integrity, Transaction Safety, Version Control, Web Security, Client Relationship Management, Technical Documentation

Professional Skills: Client Communication, Requirements Gathering, Problem-Solving, Adaptability, Technical Documentation, End-to-End Project Ownership

Languages Spoken: English, Urdu, Punjabi

PROFESSIONAL EXPERIENCE

Founder & Lead Developer — AlphaGeeks

Jan 2025 – Present

Lahore, Pakistan (Hybrid/Remote)

- Founded and lead AlphaGeeks, delivering production websites and full-stack web applications using Next.js, React, Tailwind CSS, Node.js, and modern JavaScript while managing client relationships end-to-end.
- Delivered three production-ready client projects to date, owning technical delivery, quality assurance, and client relationships from discovery through launch.
- Modernized a freight/logistics client's online presence using Tailwind CSS, JavaScript, and Three.js, designing a dispatch-team-specific quote-request workflow to streamline service inquiries.
- Led client engagements from discovery call through launch — gathering requirements directly from stakeholders, mapping site information architecture, and delivering handoff documentation — keeping builds on schedule and maintainable after handover.
- Maintained a consistent ~24-hour client response time as a standing service commitment, supporting client trust and repeat engagement.
- Designing and developing AgencyOS, an internal CRM and workflow-automation platform, using Next.js, Prisma ORM, Supabase, and the OpenAI API to consolidate the agency's own operations onto one system.
- Applying unit testing practices with Jest across application modules to improve code reliability and reduce regressions before deployment.

PROJECTS

AgencyOS — AI-Powered Agency Operating System

Active Development

Next.js, React, Prisma ORM, PostgreSQL, Supabase, OpenAI API, n8n, Jest

- Designing and developing an AI-powered operating system that centralizes CRM, project management, finance, documents, and client communication into a single platform for digital agencies.
- Building a unified architecture using Prisma ORM and PostgreSQL via Supabase with a scalable, modular codebase.
- Integrating OpenAI APIs to automate proposal generation, email drafting, workflow summaries, and business operations.
- Developing self-hosted automation pipelines with n8n to reduce repetitive administrative work.
- Writing unit tests with Jest to validate core business logic and improve overall code quality and maintainability.
- Core CRM, authentication, project management, AI modules, and workflow automation are actively under development with continuous UI and feature improvements before production release.

MediPOS — Pharmacy POS & Inventory Management System

Electron, React, JavaScript, SQLite, better-sqlite3, Vite

- Built a local-first desktop pharmacy POS with Electron, React, and SQLite, supporting offline operations, medicine CRUD, POS billing, invoice management, and printer-ready receipts.
- Implemented FEFO inventory management, batch/expiry tracking, tablet-level pricing, discounts, cash/credit payments, customer phone search, and role-based Admin/User access.
- Designed transaction-safe financial logic using integer paisa, automatic backups, and an architecture prepared for future cloud synchronization.

American ASK4 Logistics — Company Website

Tailwind CSS, JavaScript, Three.js

- Designed and developed a high-performance logistics website, modernizing the company's online presence with a mobile-first, responsive build.
- Designed a quote-request flow tailored to dispatch teams, plus clear service breakdowns, with a focus on speed, SEO, and scalability.
- Scored 100 Performance, 100 Accessibility, 100 SEO, and 96 Best Practices on Google PageSpeed Insights (Mobile & Desktop). Live in production.

Personal Portfolio Website for a Creative Professional

Next.js, Tailwind CSS, Framer Motion

- Designed and developed a personal portfolio for a client, using a clean case-study layout so the client's own work stays the visual focus rather than the template.
- Scored 100 Performance, 100 Accessibility, and 96 Best Practices on Google PageSpeed Insights (Mobile).

AlphaGeeks Website

Next.js 15, Tailwind CSS, Framer Motion, GSAP, Anime.js

- Designed, developed, and deployed the agency's own site to win client trust rather than just attention — a scroll-driven brand story, services grid, and conversion-focused contact flow.
- Scored 100 Performance, 96 Accessibility, 100 Best Practices, and 92 SEO on Google PageSpeed Insights (Mobile & Desktop).

TahaBuilds Portfolio

Next.js, Framer Motion, Anime.js

- Personal portfolio showcasing selected projects, technical case studies, and development expertise; optimized for SEO and Core Web Vitals, deployed and maintained on Vercel.

EDUCATION

Associate Degree Program (ADP) in Computer Science

Oct 2023 – Aug 2025

University of Central Punjab (UCP), Lahore, Pakistan

- CGPA: 3.52 / 4.00
- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Programming, Web Application Development, Operating Systems, Mobile Application Development

Post-ADP (BS Computer Science) — In Progress

University of Education (UE), Division of Science and Technology

ICS, Computer Science

Oct 2021 – May 2022 | Grade: A

Punjab Group of Colleges

CERTIFICATIONS

- Foundations of Cybersecurity — Google | Issued Aug 2025 | Credential ID: 3ANF4NMHGH
